IMPORTANT READ CAREFULLY

THIS BUILDING WILL BE FUMIGATED WITH LETHAL GASES ON THE DATE(S) INDICATED ABOVE. ALL PERSONS AND ANIMALS MUST VACATE THESE PREMISES ON OR BEFORE ARRIVAL OF THE FUMIGATION CREW. UNDER NO CIRCUMSTANCES CAN ANYONE ENTER THE BUILDING UNTIL THE FUMIGATION COMPANY'S NOTICE IS POSTED GIVING THE TIME AND DATE FOR SAFE RE-ENTRY.

“State law requires that you be given the following information: “CAUTION--PESTICIDES ARE TOXIC CHEMICALS. Structural pest control companies are registered and regulated by the Structural Pest Control Board and apply pesticides which are registered and approved for use by the California Department of Pesticide Regulation and the United States Environmental Protection Agency. Registration is granted when the State finds that, based on existing scientific evidence, there are no appreciable risks if proper use conditions are followed or that the risks are outweighed by the benefits. The degree of risk depends upon the degree of exposure, so exposure should be minimized.”

If within 24 hours you experience symptoms of dizziness, headache, nausea, reduced awareness, slowed movement, garbled speech or difficulty in breathing, leave the structure immediately and seek medical attention by contacting your physician or Poison Control Center (800-876-4766) and notify your pest control company. The warning agent, chloropicrin, can cause symptoms of tearing, respiratory distress and vomiting. Entry into the space during fumigation can be fatal.

For further information, contact any of the following: Your pest control company; for health questions, the County Health Department; for application information, the County Agricultural Commissioner; for regulatory information, the Structural Pest Control Board, 2005 Evergreen Street, Ste. 1500, Sacramento, California 95815

YES NO **“Are you aware of any conduits, pipes, etc., that would allow the passage of the fumigant from the structure to be fumigated to any other adjacent or adjoining structure?”**

*NOTE: Removal and/or masking over the accessible Drywood Termite fecal pellets is highly recommended. It is possible for Drywood Termite pellets to sift down or reappear in areas where they have been masked. **We suggest that you notify nearby neighbors of the date of fumigation and to keep pets away during the fumigation. Close off any open access to the subarea to prevent pets from entering.*

I hereby acknowledge receipt of a copy of this document as well as a list that includes the instructions for the necessary preparations for the fumigation, procedures for leaving the structure, and the following documents

Phone: (408) 918-9100 Fax: (408) 918-9105 or (408) 918-9104

ADDRESS TO BE FUMIGATED:

You may re-enter property following the date and time stated on the Notice of Re-entry.

THE FUMIGANT TO BE USED WILL BE VIKANE GAS OR ZYTHOR GAS FUMIGANT (SUFURYL FLOURIDE).

Chloropicrin gas will be used as a warning agent.

Fumigation is for the control of: Drywood Termites

Beetles

Other(s)

PREPARATION BY OWNER OR OCCUPANT PRIOR TO FUMIGATION

1. **The following items must be removed from the property before fumigation can begin:** All persons, domestic animals, pets, including fish and desirable growing plants; remove baby bed mattresses and/or any mattresses (except waterbeds) and/or pillows that are **encased in plastic only UNLESS** plastic covers can be removed. Food, feed, drugs, and medicines (including those items in refrigerators and freezers) can remain in the structure **IF** they are in glass or metal bottles, cans or jars **with the original manufacturer's airtight seal intact.** Food, feed, drugs and medicines (including those items in refrigerators and freezers) not in glass or metal bottles, cans or jars with the original manufacturer's airtight seal intact, need to be removed from the fumigation site, or double bagged in Nylofume bags. We will remove all food items found on the premises that are not in factory sealed glass or metal containers or in the Nylofume bags. All perishables may be thrown away. Non-perishables may be stored outside of the building at occupants' cost and liability.
2. Dishes and utensils DO NOT need to be removed nor washed after fumigation. Structural fumigants are colorless, odorless and will not affect fabrics, paints, finishes THAT HAVE HAD SUFFICIENT TIME TO DRY. They will not leave a residue on surfaces.
3. Vines and shrubs connected to the building must be detached, trimmed, or removed by the owner leaving at least 12" inches of space to allow the fumigation tarps to go between the shrubs and the building. Gravel, bark, and other decorative ground cover or debris must be raked back 12" inches away from structure(s) to expose flat ground/dirt. Due to the nature of the work, we cannot be held responsible for trampled or damaged plants. The day before the fumigation, the soil surrounding the structure(s) 12" outward (including decks, garages, etc.) must be watered to a depth of at least 2". This will require approximately 1 hour of soaking, depending upon soil conditions. from the structure.
4. We are required to have P.G.& E. shut off the natural gas supply going into the house to guard against problems associated with gas leaks and to prevent the fumigant from reacting with hot surfaces. **THE ELECTRICITY MUST STAY ON. It is the occupant's responsibility to have P.G.& E. turn the gas back ON and re-light the pilot lights. IF YOU HAVE PROPANE, IT IS THE OWNERS' RESPONSIBILITY TO TURN IT OFF AND BACK ON.**
5. Our crews fumigate several structures in various locations each day. Therefore, the time that any fumigation is scheduled must be approximate. Removal of tarps after proper exposure to the fumigant is usually 20 hours following the introduction of the fumigant **BUT** may be as few as 12 hours depending on the dosage. **YOU WILL NEED TO BE OUT OF THE PROPERTY FOR AT LEAST 2 NIGHTS. APPROPRIATE NOTICE OF RE-ENTRY WILL BE POSTED WHEN IT IS SAFE TO ACCESS THE STRUCTURE(S).**
6. It is required that the fumigator have keys to the premises during the course of fumigation. We must have access to all parts of the building, including garages, safes and rooms that are normally kept locked. Any vehicle left within the structure which is to be fumigated, must have the trunk open and all windows down. **WE MUST HAVE A COMPLETE SET OF KEYS TO THE PROPERTY.**

Phone: (408) 918-9100 Fax: (408) 918-9105 or (408) 918-9104

- 7. All fire sprinkler systems shall remain armed and monitored.
- 8. The owner or occupant must remove all antennae, weather vanes, chimney stacks, metal spark arrestors, 2 fence boards next to structure, etc. If we have to remove the antennae, there may be an extra charge. We will **NOT** re-install it, **NOR** will we be responsible for inadequate function or damage resulting from removal. We will wrap around satellite dishes; however, we **DO NOT** assume any liability for realignment.
- 9. Care will be taken to avoid damage to the roof, gutters, and any chimneys of the building; however, due to the condition of the chimney, roof and/or gutters, their age or the type of roof and/or gutters, as well as the nature of the work, some damage to the chimney, roof and/or gutters may be unavoidable.
- 10. WE CANNOT ACCEPT ANY RESPONSIBILITY FOR DAMAGE TO SOLAR SYSTEMS AND/OR ROOF DOMES.
- 11. Fumigation operations may not commence during inclement weather or high winds and may have to be rescheduled.
- 12. To avoid possible misunderstandings, our insurance company requests that all valuables, such as jewelry, cash, and objects of art be removed prior to fumigation. As a safety precaution, the fumigator must have access to all parts of the structure, including closets and storerooms that are normally kept locked. Owner/occupant/agent may post a guard at the property at his/her own discretion and expense. **WE WILL NOT BE RESPONSIBLE FOR ANY LOSS OR DAMAGE DUE TO VANDALISM, THEFT, OR OTHER ACTS OF THIRD PARTIES.**
- 13. The attic access and sub-area access need to be open prior to fumigation so gas can circulate at time of fumigation.

FUMIGATION CANNOT COMMENCE WITHOUT THIS SIGNED NOTICE IN POSSESSION OF THE FUMIGATOR. FUMIGATOR MUST HAVE A COMPLETE SET OF KEYS TO THE PROPERTY BEFORE WORK CAN BEGIN.

_____ I have read the instruction sheets and understand it is my responsibility to have all of the above preparations made before the fumigation crew arrives.

_____ I have been provided a copy of the Fact Sheet for Vikane OR Zythor (Sulfuryl Fluoride)

NEIGHBOR'S PERMISSION FORM

THIS NOTICE APPLIES TO THE NEIGHBOR(S) AT THE... RIGHT
(This would be standing at the street and facing the house)

LEFT

REAR

Property Address:

Tent-up Date:

I, the undersigned, have read and understood the following instructions and what is asked of me as a neighbor and to allow Cost Less Fumigation to work in my yard. I also understand, that without my cooperation, this fumigation cannot be performed. I'm giving Cost Less Fumigation permission to work on my property.

Keep in mind; if you have animals that stay in the yard, you will need to make arrangements for them, as the fence will remain open for at least a day or two.

1. **Stored Items:** - If you keep any stored items along this area, it will be necessary for you to remove them and provide a clear area for the workers and equipment.
2. **Plant Life:** - If any plant life is along this area, it will also be necessary for you to trim and/or pullback the plants, providing a clearing for the workers and the equipment. This area must also be watered deeply. By doing this, you will minimize any plant damage that could occur.
3. **Pets:** must keep all pets (cats/dogs/etc) inside away from our crew/fumigation process.

If you have any questions or concerns regarding the fumigation and the preparation needed, please feel free to contact our office.

-Your cooperation in this matter is sincerely appreciated by not only the owner of the property and Cost Le\$\$ Fumigation, Inc., but also all others involved in the effort to eradicate the termite infestation within the home.
